

MOVING WIRELESS FORWARD®

Mobile Mark's Latest Release, MME Team Exhibiting Across Europe, & Key Technical Info from our VP of Engineering Team

Welcome to Our Newsletter

Thank you for reading our new quarterly newsletter. Our goal here at Mobile Mark is to maintain open communication with our customers and partners, sharing news, information, and updates every quarter. Each edition will include news from our headquarters in Itasca, Illinois and from our European Office in Hednesford, England. For more, follow us on LinkedIn and sign up for Newsletter by "Contact Us" at the bottom of our homepage at www.mobilemark.com

MX900 Series Update

During the release of the latest Mobile Mark antenna, the MXG944, our customers and partners praised the advancement, innovation, and style of the product. Now five months after its launch, the MX900 Series has received positive feedback and remarks across the board, and we are excited to launch the rest of the collection.

The MX900 Series is famed for its nine-element setup with four WiFi cables, but it can now contain up to five WiFi elements and comes in both black and white. The series now includes other variations including **MXG945**. To facilitate rapid testing, our engineers offer several solution options. This is an example of how Mobile Mark engineers and conscientious, designing for the entire project and with you in mind. Easy testing can make or break a project. Our aim is to make doing business with Mobile Mark easy and streamlined. Contact Us Today. The MXG944 is only the beginning. The MX900 Series will continue to expand with further innovation, improvement, and advancement. Stay tuned for the next antenna in the MX family, coming soon!

From Across the Pond – Our European Office

Mobile Mark Europe (MME) will be exhibiting at both the Intertraffic Exhibition at The Rai, Amsterdam 16 – 19th April, as well as the Battery Cells Systems Exhibition, at the NEC, Birmingham 15 – 16th May. At these exhibitions, we will be displaying a range of high performance antennas, such as our low profile LLP Series, which is well suited for the EV Charger market. In remote locations or tough conditions we offer a wide range of antennas that offer LTE/5G network coverage, perfect for EV charging stations. We also offer an extensive range of Multi-Band antennas that offer coverage if both Wi-Fi and LTE or our latest options that cover 6 – 2 – 6 bands.

LLP Multiband Antenna

MOVING WIRELESS FORWARD®

Bands, Bands, Bands!

As the popularity of frequency bands rises in the US, our VP of Engineering, Jerry Posluszny, has shared a massive document listing all of the frequency bands covered by each antenna we engineer. This assemblage of specifications supports our dedication to the comfort and trust of our customers; with this information readily available, our customers and partners can easily navigate this newly popularized way of pairing project systems, requirements, and hardware to the correct antenna. The frequency bands covered by an antenna dictate the applications it can be used for and the compatible products with which it can be paired. For engineers and those in the know, bands are an essential aspect of any wireless project, but for the uninitiated, bands may simply be boxes to check when contacting their antenna supplier. Improving our communication of band coverage helps those placing orders, who may not be engineers, understand how our antennas will work for their applications and specifications. This will help make placing an order with Mobile Mark simple and streamlined. Along with numerous engineering white papers, articles, and information, this frequency band document will soon be available online at www.mobilemark.com

Inside Mobile Mark

In case you missed it, the Mobile Mark teams released our 2024 Corporate Video on YouTube in February with an invitation to come visit our facilities in Illinois, USA and in Hednesford, UK. Our business associates, partners, and customers alike reportedly enjoyed the insider's look at Mobile Mark. The video takes viewers through our company along our pillars of business-- our people, our products, and our production capabilities. With cameos from every department, watchers get a new perspective on their antenna supplier and what makes us different. We cannot overstate our pride in our teams and our content. This video is a testament to our teams' commitment and passion. Our goal in making the video was to share our determination to move wireless forward and showcase the people who make it all possible. View the video for yourself on our YouTube channel, Mobile Mark Inc. Also in the digital space, we have created a new Facebook page, Mobile Mark, Inc. Antenna Solutions. This page will post our company updates, product information, and more to deepen communication with our partners and customers. Our Marketing team can be reached via direct messaging the page, so any customer or viewer can get in touch quickly. Like our page to stay up-to-date on our latest news.

Coming Next Quarter

- Trade Shows
 - Intertraffic - Amsterdam
 - Battery Cells Systems - Birmingham, UK
 - CradlePoint Global Partner Summit - New Orleans, LA
- Mobile Mark's 40th Anniversary
- New Product Development
- Updates and Upgrades to our Website
- More YouTube Videos including Product Trainings
