

MOVING WIRELESS FORWARD®

Mobile Mark's Latest Release, New Products, and Technology Upgrades

Fall is Here Don't Fall Behind on Opportunities

As the year draws to a close, the pressure mounts for government agencies and organizations working on federally funded projects to meet critical deadlines. Missing these deadlines can lead to funding lapses, project delays, and potential setbacks in achieving program goals this year and next. With the Mobile Mark advantage, you can WIN these projects; how? Our products are made in the United States, and our engineering and manufacturing work under the same roof, making Mobile Mark uniquely positioned to quickly understand your needs and produce the product you need to win the project. Last but certainly not least, with generally only two weeks' lead times, you can count on Mobile Mark to get it done in time.

Mobile Mark 40th Anniversary - Thanks!

In last quarter's newsletter, we proudly announced that July marked our 40th anniversary. As remarkable as this achievement is, we are very thankful and humbled by the many kind words, congratulations, and encouragement we received. Even our hometown of Itasca, Illinois, bestowed upon us a "Proclamation" presented by Mayor Jeff Pruyn onsite to the entire team. This bears witness to the legacy Irv wanted to build, which we carry on today: building quality, long-lasting trusted products, and even stronger, long-lasting trusted partnerships.

Mobile Mark - Online Anytime

Many new and exciting changes are happening with our Mobile Mark eCommerce store. We're excited to announce the launch of our latest products, which are now available online! Explore a fresh selection of mobile, infrastructure, utility, and fleet management products designed to maximize your equipment's performance, giving you unmatched capacity, speed, and unwavering connectivity under the harshest conditions. Each product is designed with purpose and carefully manufactured in the United States, offering you the highest quality at a competitive price. Shop now and be among the first to experience these exciting new additions—don't miss out!

From Across the Pond – Our European Office

Mobile Mark Europe exhibited at The Intertraffic Exhibition in Amsterdam, and the Battery Cells Systems Exhibition in Birmingham, this past quarter. Both shows were incredibly successful as we featured our wide range of high-performance antennas that are ideal to use within the EV Chargers in remote locations that require strong transmitting connections. We also featured our New MX900 Series, Rubber Ducks, Covert Integrated Antennas, and Cable Assemblies.

EDX Dipoles – Solutions in Palm of Your Hands

Our customers who have purchased the Mobile Mark EDX Series Dipoles know firsthand of the EDX Dipoles' unmatched durability, dependability, connectivity, and affordability. Mobile Mark dipoles have a greater bandwidth of 150 MHz-512 MHz (UHF, PTC, or VHF) than other basic dipoles and can support numerous radios and frequencies. Yet this only scratches the surface of what this amazing product series offers.

Each product in the EDX series is simple to use and set up easily. Each EDX is constructed from heavy-duty materials, enabling it to withstand extreme environments, such as Category 4 hurricane winds. Since each EDX is inherently DC grounded, it can withstand lightning! Now that's tough!

Its best value is its versatility in the field. The Mobile Mark dipole can be stacked together to increase gain without compromising the vertical beam angle. Our dipoles can be phased together to create an omnidirectional radiation pattern, and if you require wider coverage, dipoles can be mounted side-by-side.

The EDX Dipole series is one of the most complete ecosystem solutions on the market, offering half-wave and quarter-wave technology and an array of accessories such as couplers, sackers, and phase harnesses. Contact your Mobile Mark Sales Representative to learn more.

Easier to do Business Mobile Mark Expands Match-Up Guides

Mobile Mark launched several new Match-Up Guides created to make it quick and easy to optimize Mobile Mark product compatibility with the most popular routers in the market. The full lineup of Match-Up Guides can be found for free on the Mobile Mark website, [Match Up Guide](#). Still have questions? Mobile Mark also has a USA-based Sales and Customer Service team ready to assist with product selection questions. Choose a method from the footer. We look forward to hearing from you.

Always Something New at Mobile Mark

Mobile Mark is on the move. With new products, white papers, and shows. This quarter, Mobile Mark will launch the new ECO-600/7200 Omnidirectional antenna, 617-960 & 1710-7200 MHz. Stay tuned for our promotion and be sure to check out our website for more information.

Did you check out our new white paper on Railway antennas? Mobile Mark offers a state-of-the-art line of antennas, specifically engineered for tough conditions and strict industry regulations. On the train or inside the train, Mobile Mark antennas keep your connections on track! [Keep your Rail Communications from Getting Derailed](#).

Mobile Mark is dedicated to your success. We have developed products and expertise in sixteen industries, and we exhibit them at many industry events.

Installation Instructions – Now Available Online

[Mobile Mark Product Installation Manuals](#). Welcome to our new location for Mobile Mark and Comtelco Electronic Product Installation Guides. Currently, you will find fifty Installation Guides located in a single spot for your convenience, with more soon to arrive. Now our manuals are available 24/7-365 days a year, always ready when you are. In addition, if they get lost, or destroyed you can download another copy quickly and easily, keeping your project on track. We trust you will find this a great experience, however if you can't find what you need or have other questions simply scroll to the page footer and select Contact Us to send an email or call. We appreciate your patronage. Mobile Mark, "Moving Wireless Forward®".
