

## California Proposition 65 Compliance Statement

Mobile Mark, Inc. has dedicated significant resources in 2018 to investigate and liaise with our vendors regarding **California Proposition 65**, formally known as the Safe Drinking Water and Toxic Enforcement Act of 1986. This law aims to safeguard Californians and the environment from excessive exposure to harmful carcinogens and toxins that can cause cancer, birth defects, or other reproductive harm.

**California Proposition 65** mandates businesses to inform Californians about significant exposures to chemicals that can cause cancer, birth defects, or other reproductive harm. The **California Proposition 65** list encompasses a broad range of naturally occurring and synthetic chemicals. These include additives or ingredients in pesticides, common household products, food, drugs, dyes, or solvents. Listed chemicals may also be utilized in manufacturing and construction, or they may be byproducts of chemical processes, such as motor vehicle exhaust.

Mobile Mark conducts thorough reviews of suppliers' certifications, content declarations, and confidentially disclosed chemicals and material information. Based on this information, we have identified potential harmful chemicals such as Lead (Pb), Cadmium (Cd), Chromium VI (CrVI), and Nickel (Ni) that may be used in antenna products. However, to the best of our knowledge and belief, our antenna products do not contain any of these listed chemicals as per the California Proposition 65 chemical listings.

After conducting these extensive checks, we certify that the antennas provided by Mobile Mark are produced in compliance with **California Proposition 65**.

Mobile Mark Inc. understands the importance of keeping our customers informed about issues that may impact on the quality of our products. We are committed to ensuring that all Mobile Mark antennas are compliant. We value your business and look forward to continuing to supply you with our high-quality products.
