

Technical Specification
MAGNET MOUNT

MG SERIES MOUNTS
INSTALLATION KITS

The “MG” series mounts are magnet mounts 3 1/8” in diameter. They have a high pull strength magnet with an ABS cover and mylar pad to prevent surface scratches. The connectors on the top of the mount are all standard female type. The mounts are supplied with 12’ LL-195 Low Loss coax and choice of connectors on the end of the cable.

The “MGZS” mount is designed to accept a standard “NMO” type antenna with 12ft of Low Loss 195 cable (LL-195).

WEIGHT: ~10 oz.
